WHY **b smart** IS BEST PRODUCT FOR

INVENTORY MANAGEMENT

Real-Time Visibility

Accuracy & Precision

Optimized storage & Retrieval

Order Fulfillment Efficiency

Demand Forecasting

Traceability & Compliance

Reporting & Analytics

KEY FEATURES

DASHBOARD

Order Management

Real-Time order status

Track total orders received, pending, and delivered for operational clarity

Order ratio insights

Visualize order ratio trends to streamline fulfillment processes efficiently.

Payment & Financial Analysis

Payment Ratio Visualization

Illustrate payment trends and ratios for financial insights.

Earnings Overview

Display earnings summary for quick financial assessment.

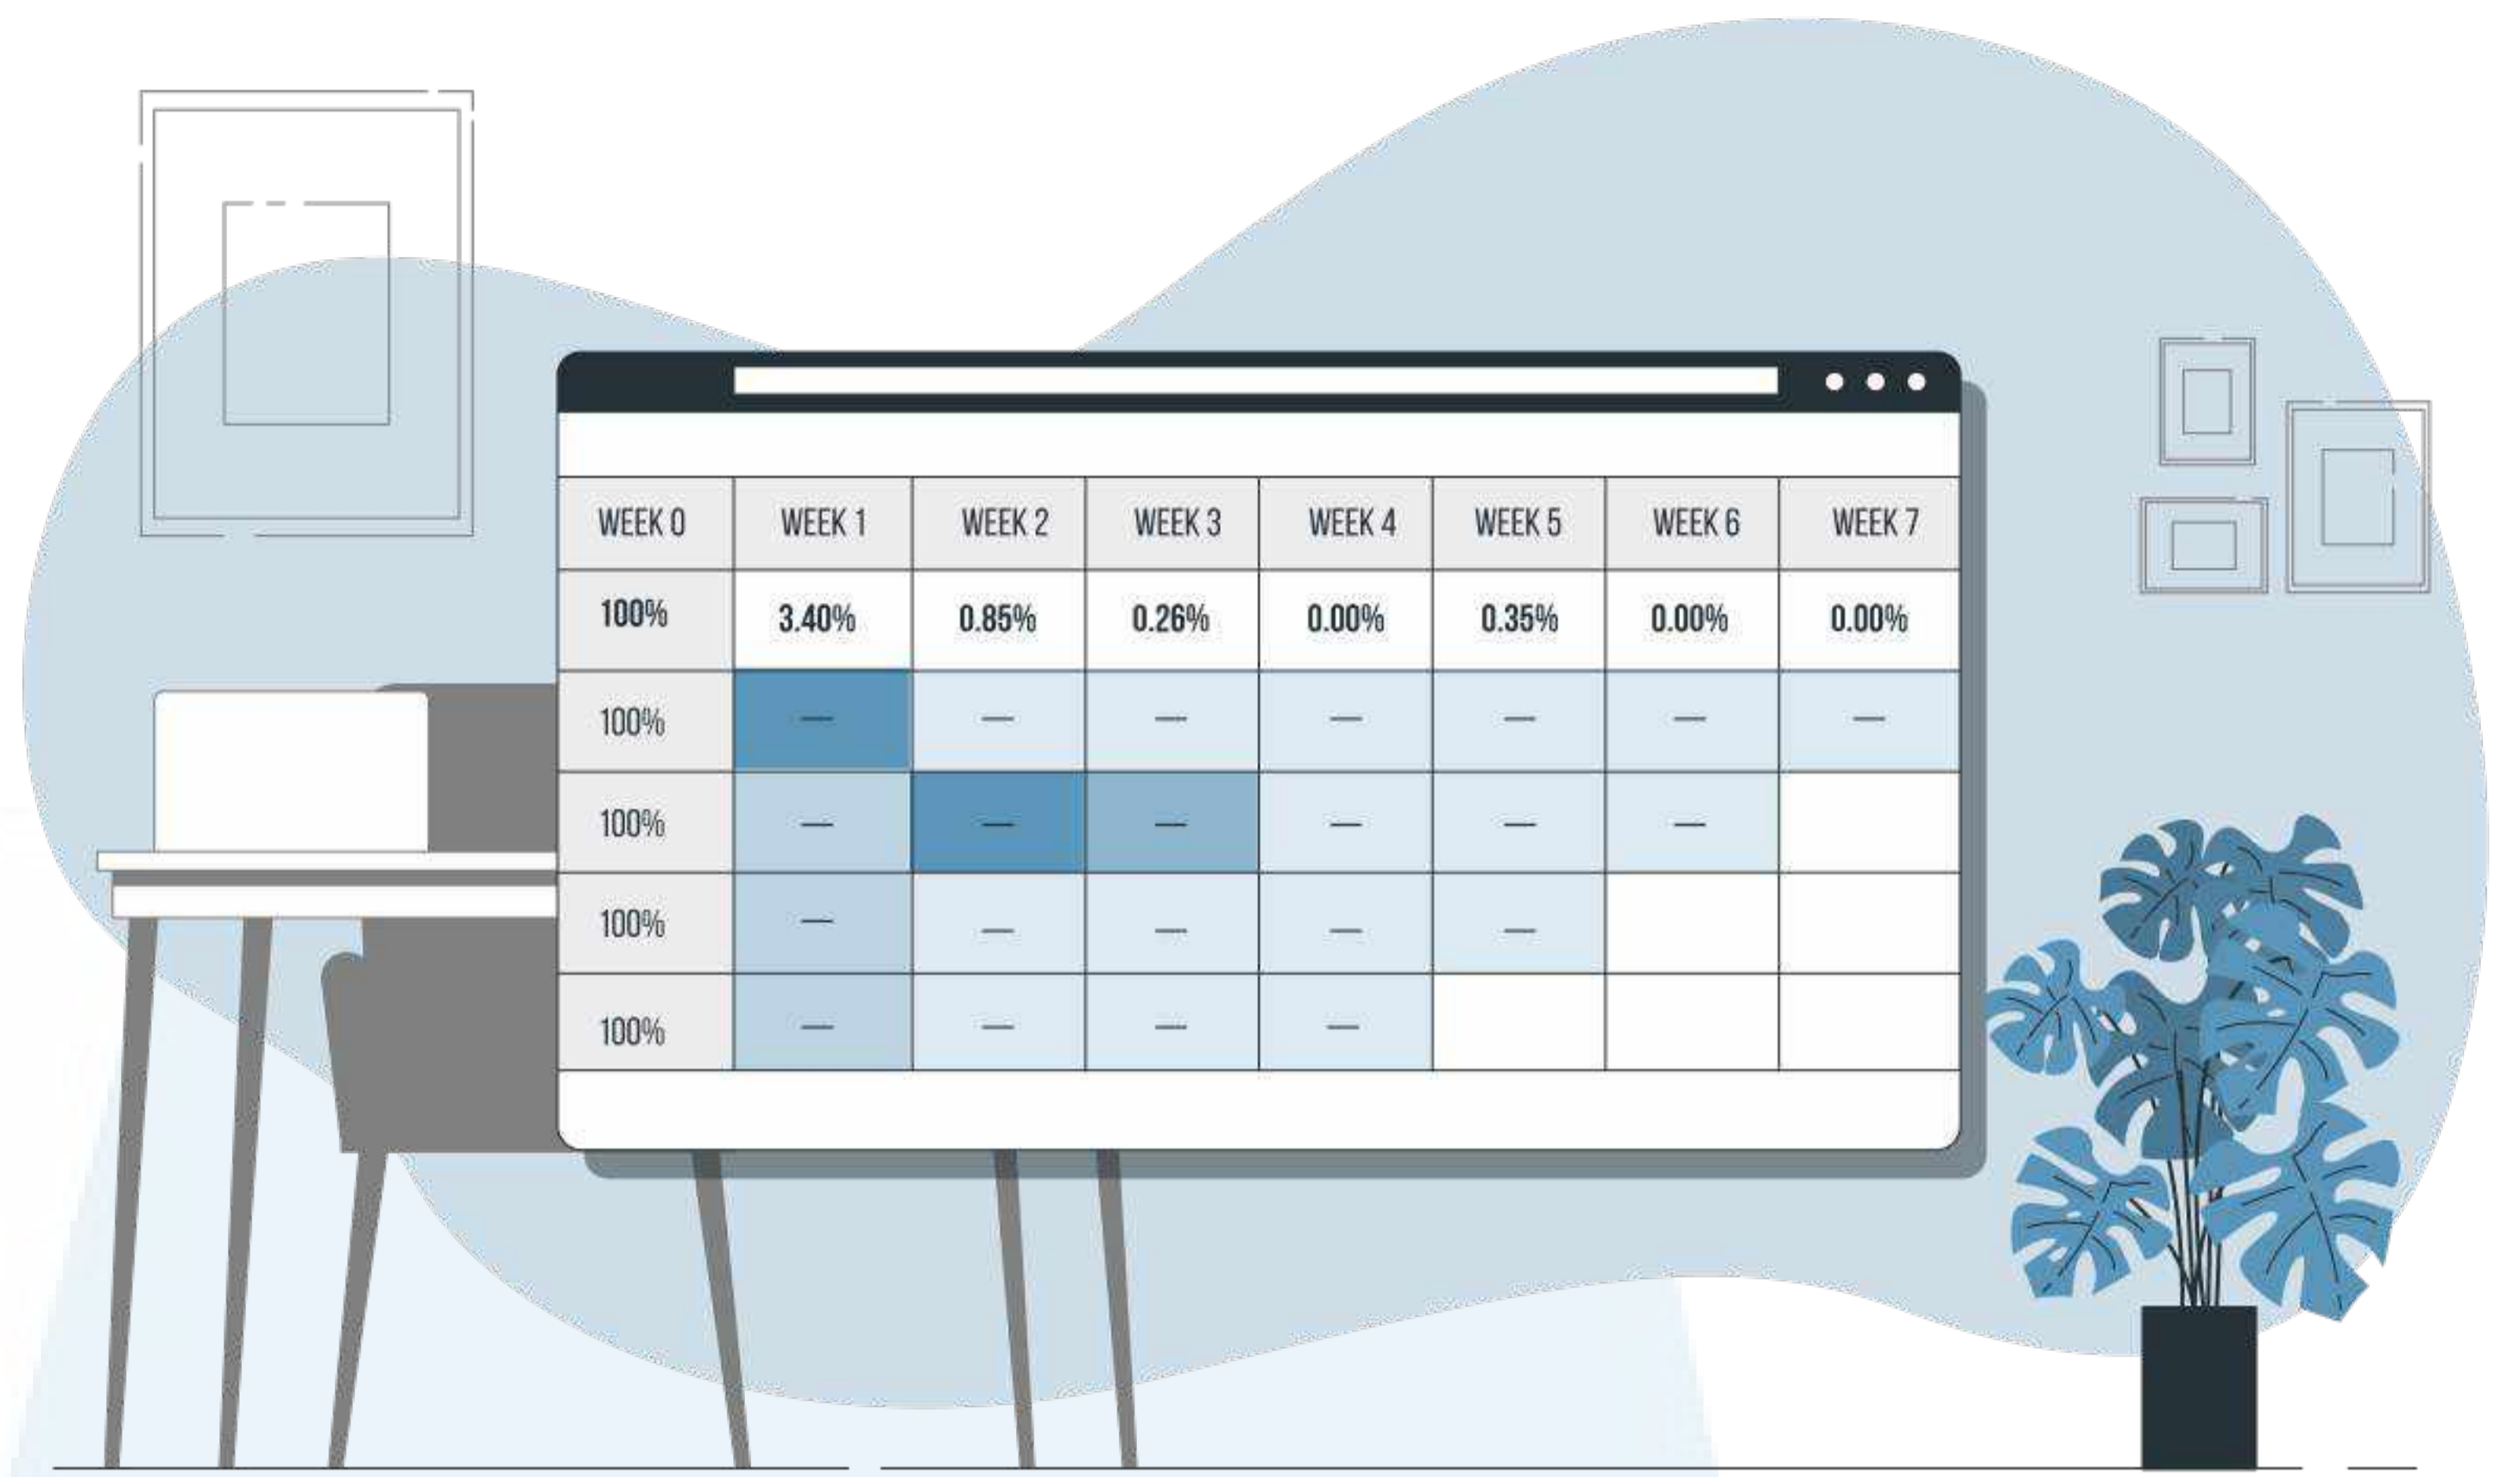

Sales & Profit indicators

Sales Performance metrics

Highlight sales figures and trends for business growth analysis.

Profit Analysis

Visualize profit margins to gauge business profitability

Expense Monitoring

Expense Tracking

Display total expenses incurred, aiding in cost control measures

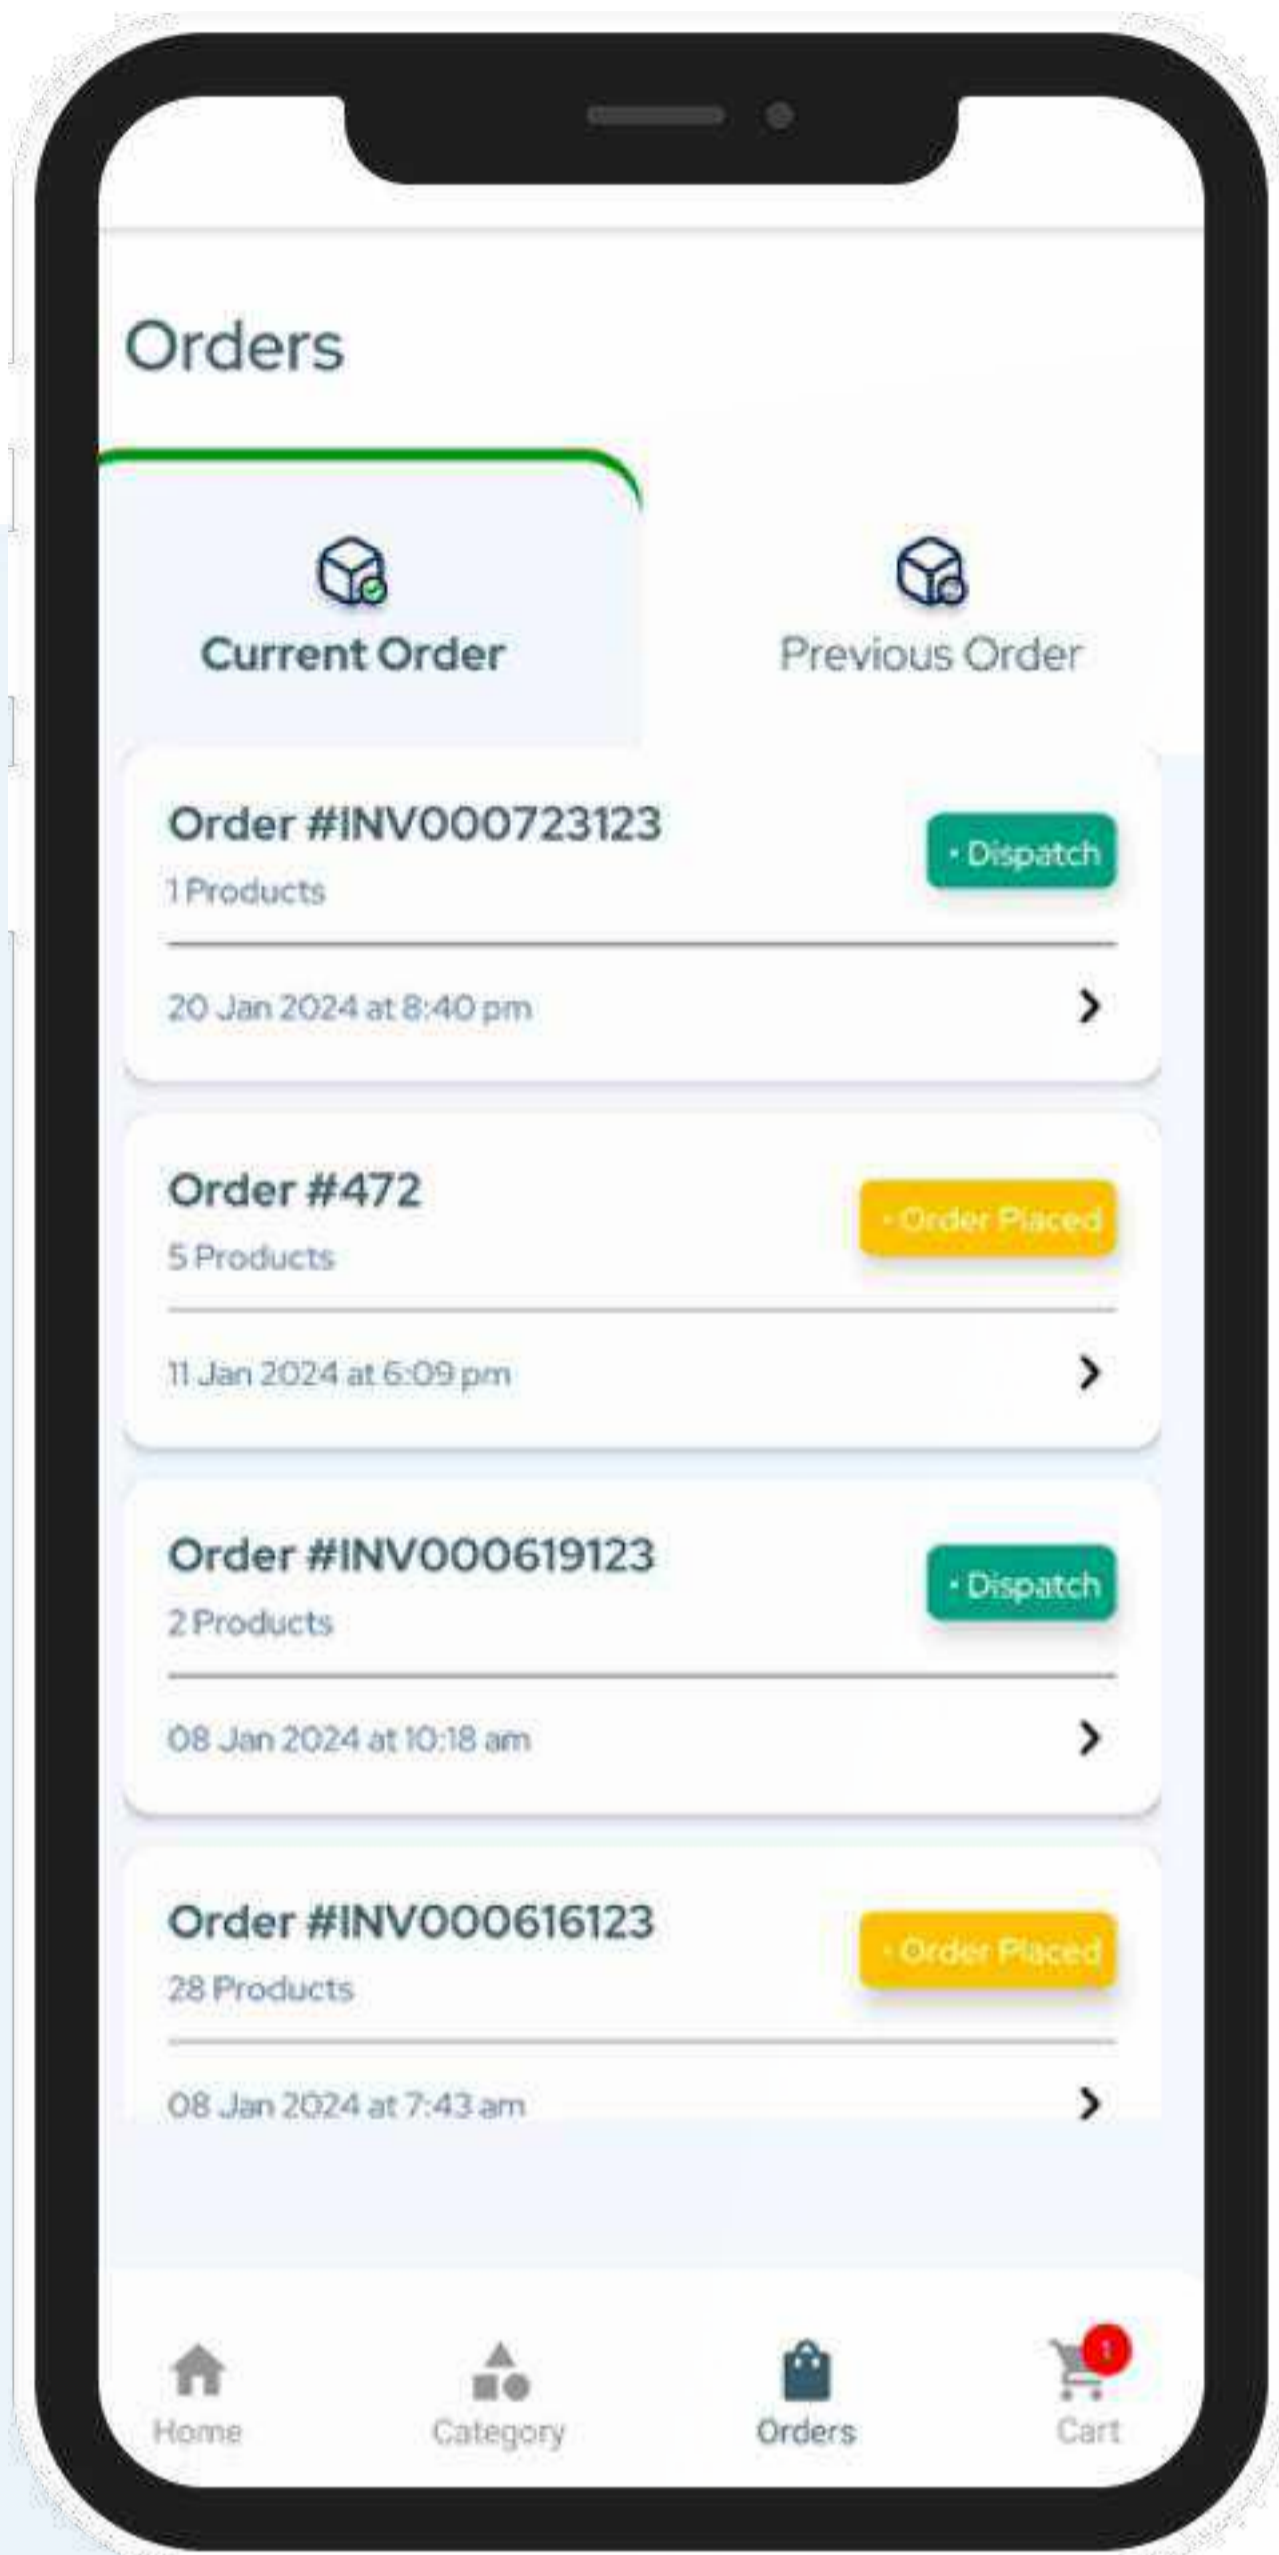

Customer app

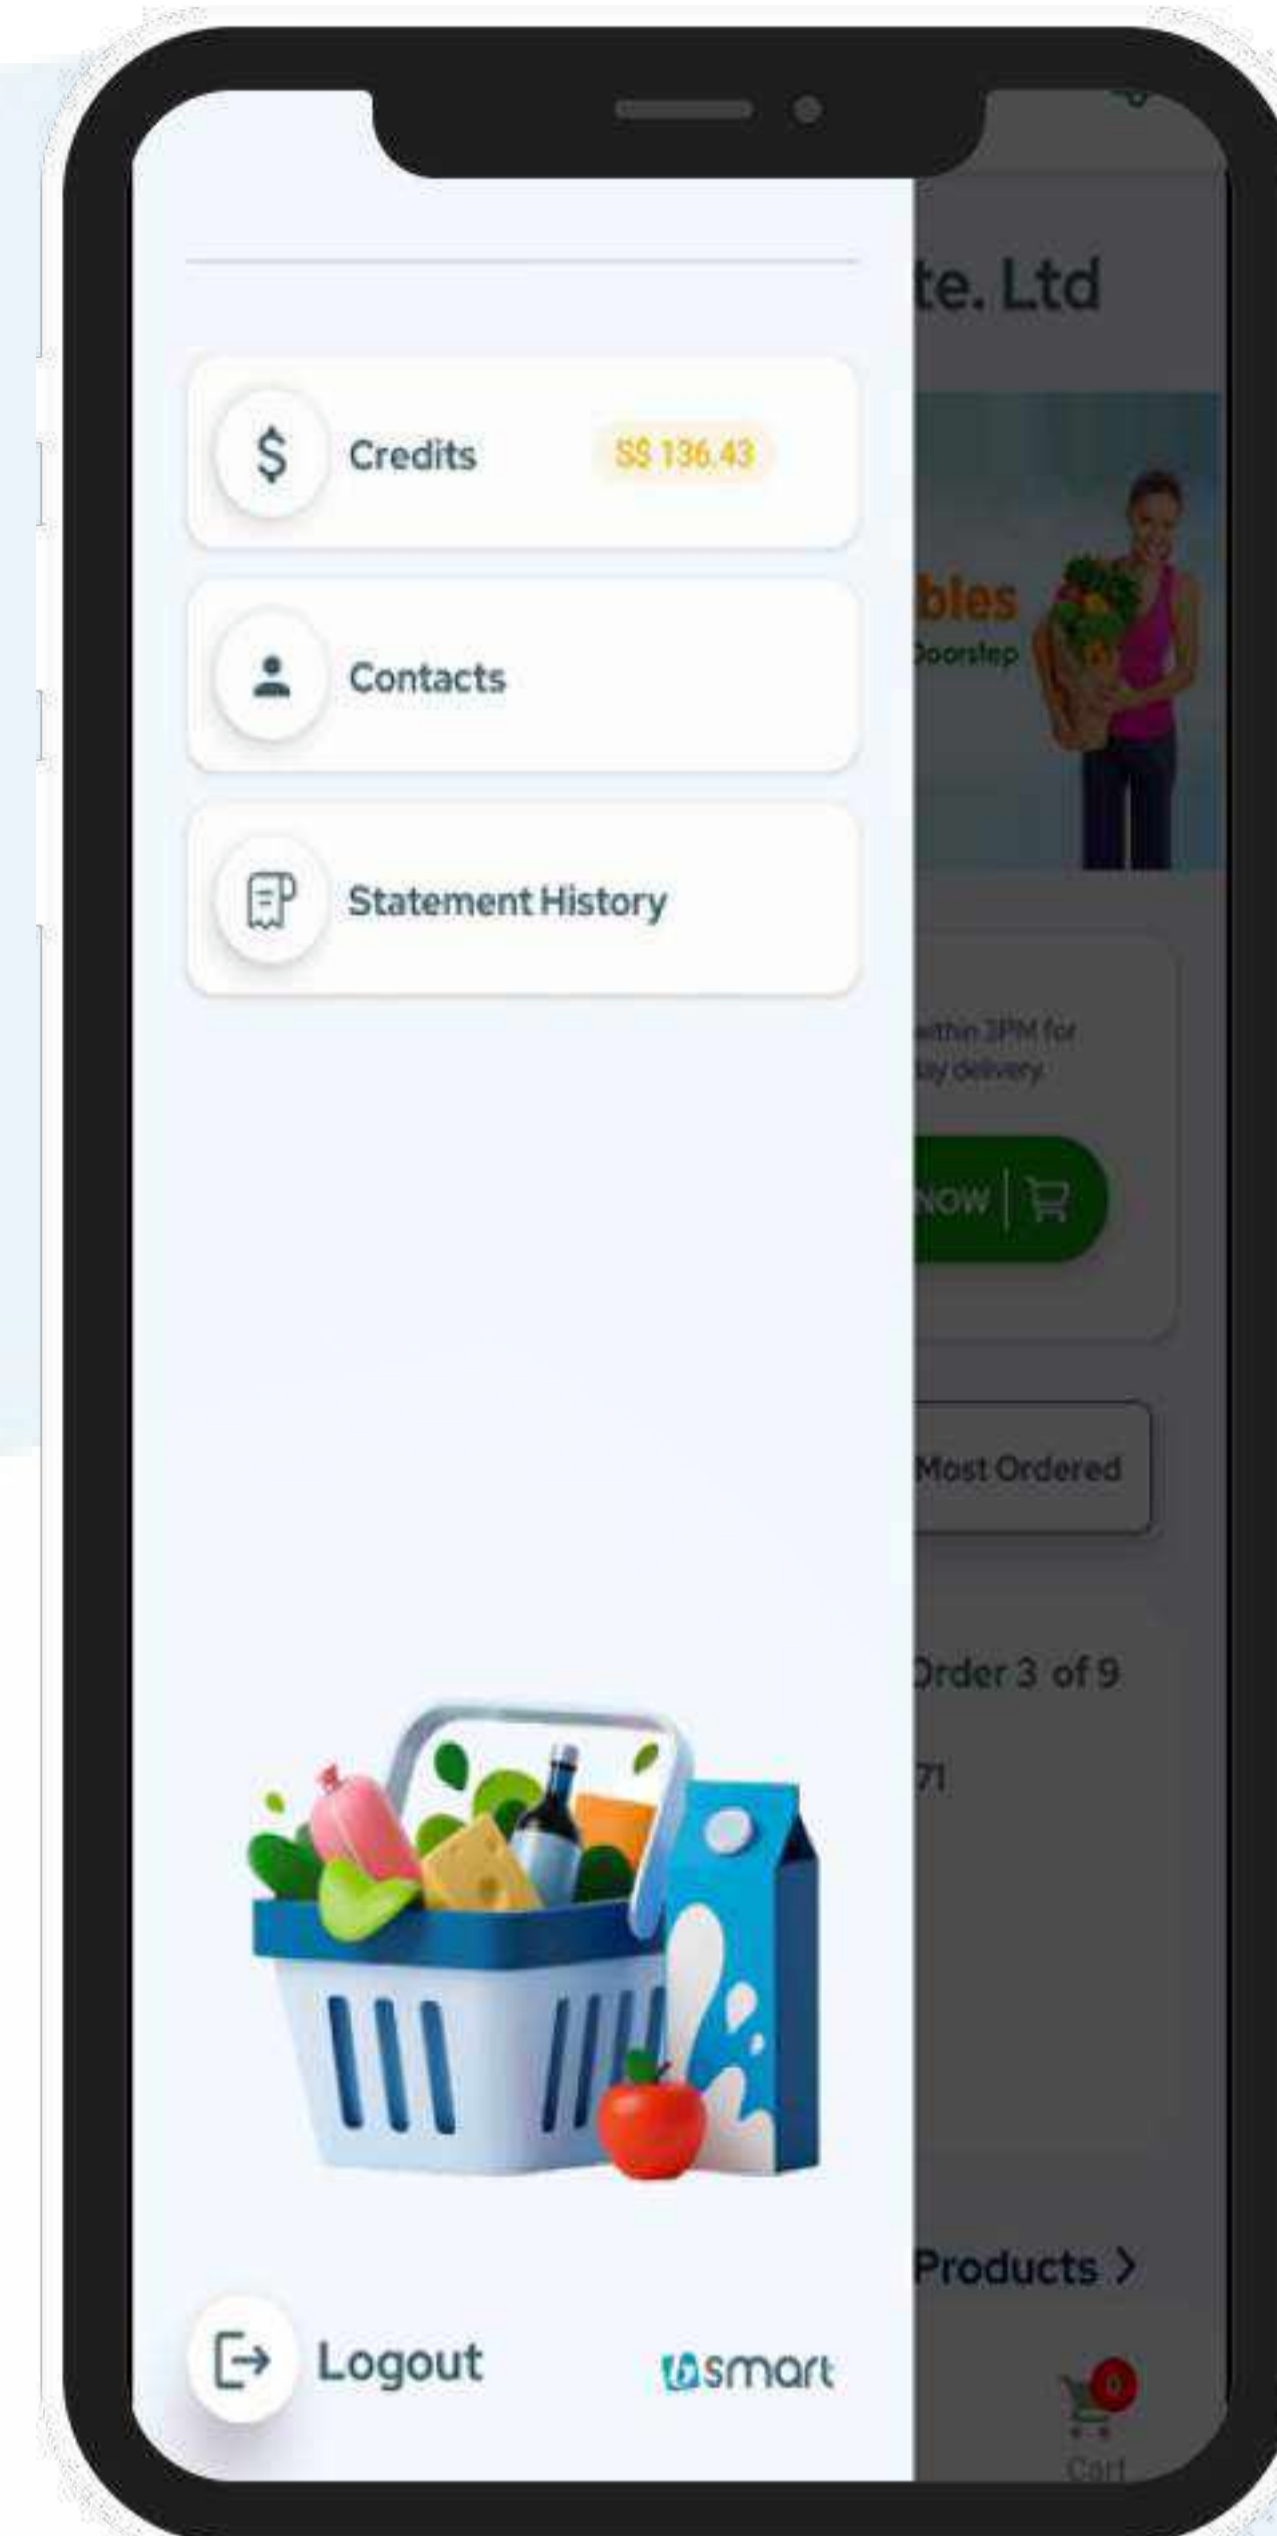

Track Your Loads

Stay informed with real-time load tracking in our Customer App

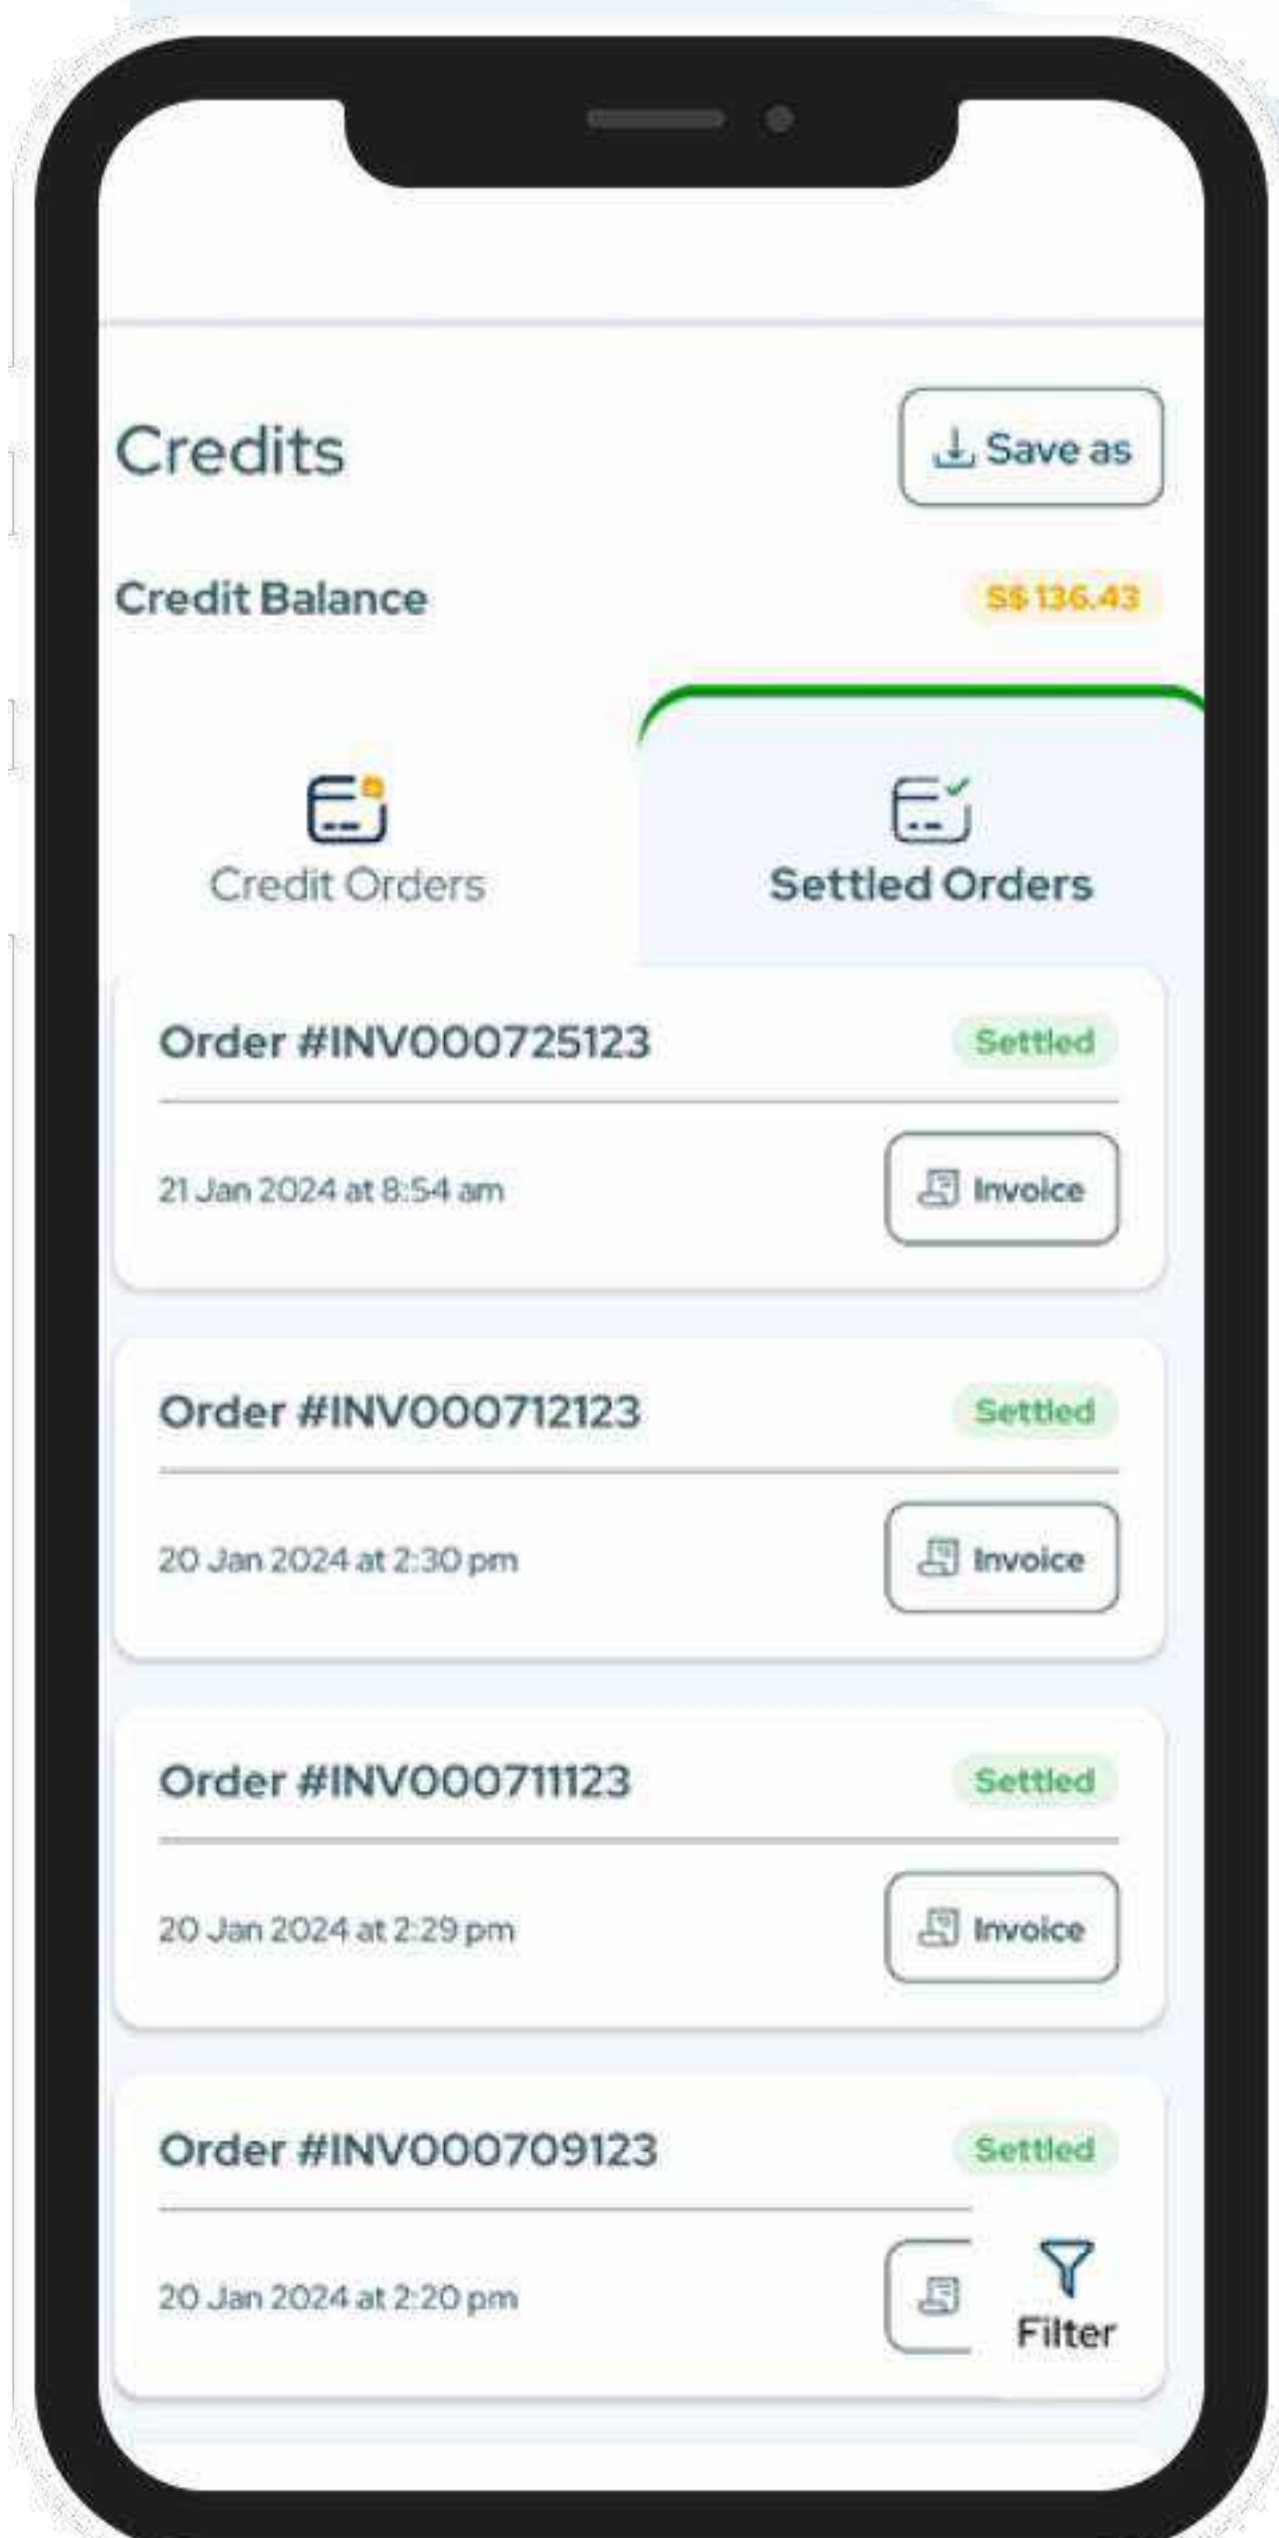

Instant Credit Updates

No more reminders! Credits seamlessly update with corresponding invoice bills immediately after processing.

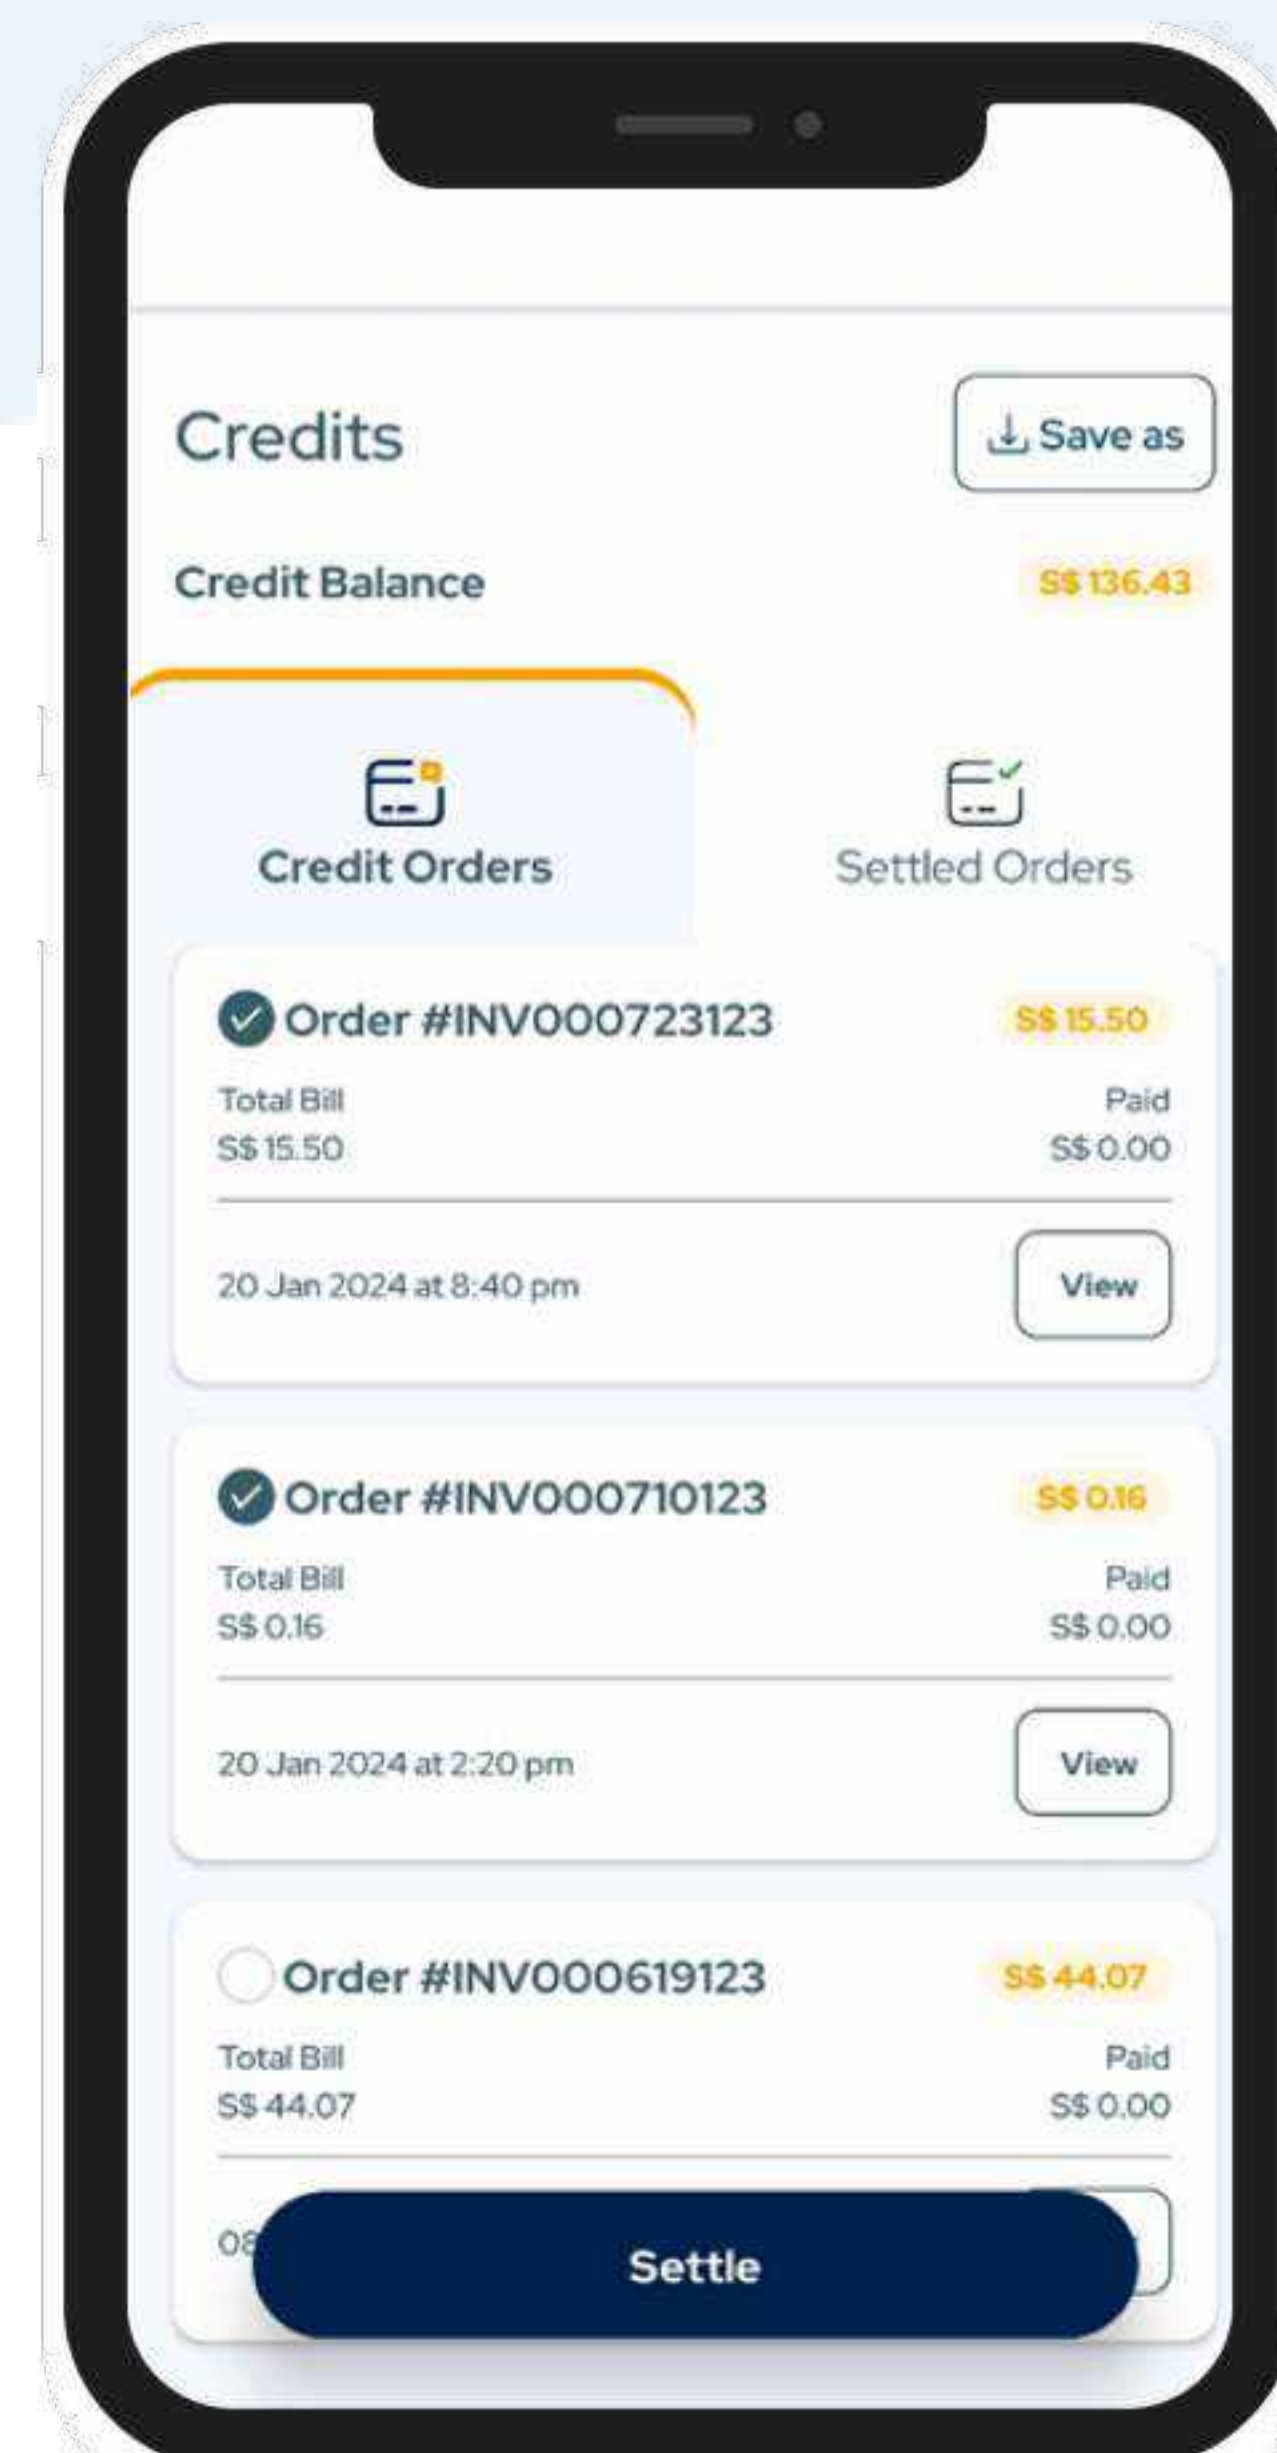

Convenient Bill Downloads

Download customer bills effortlessly in PDF format for easy reference and record-keeping

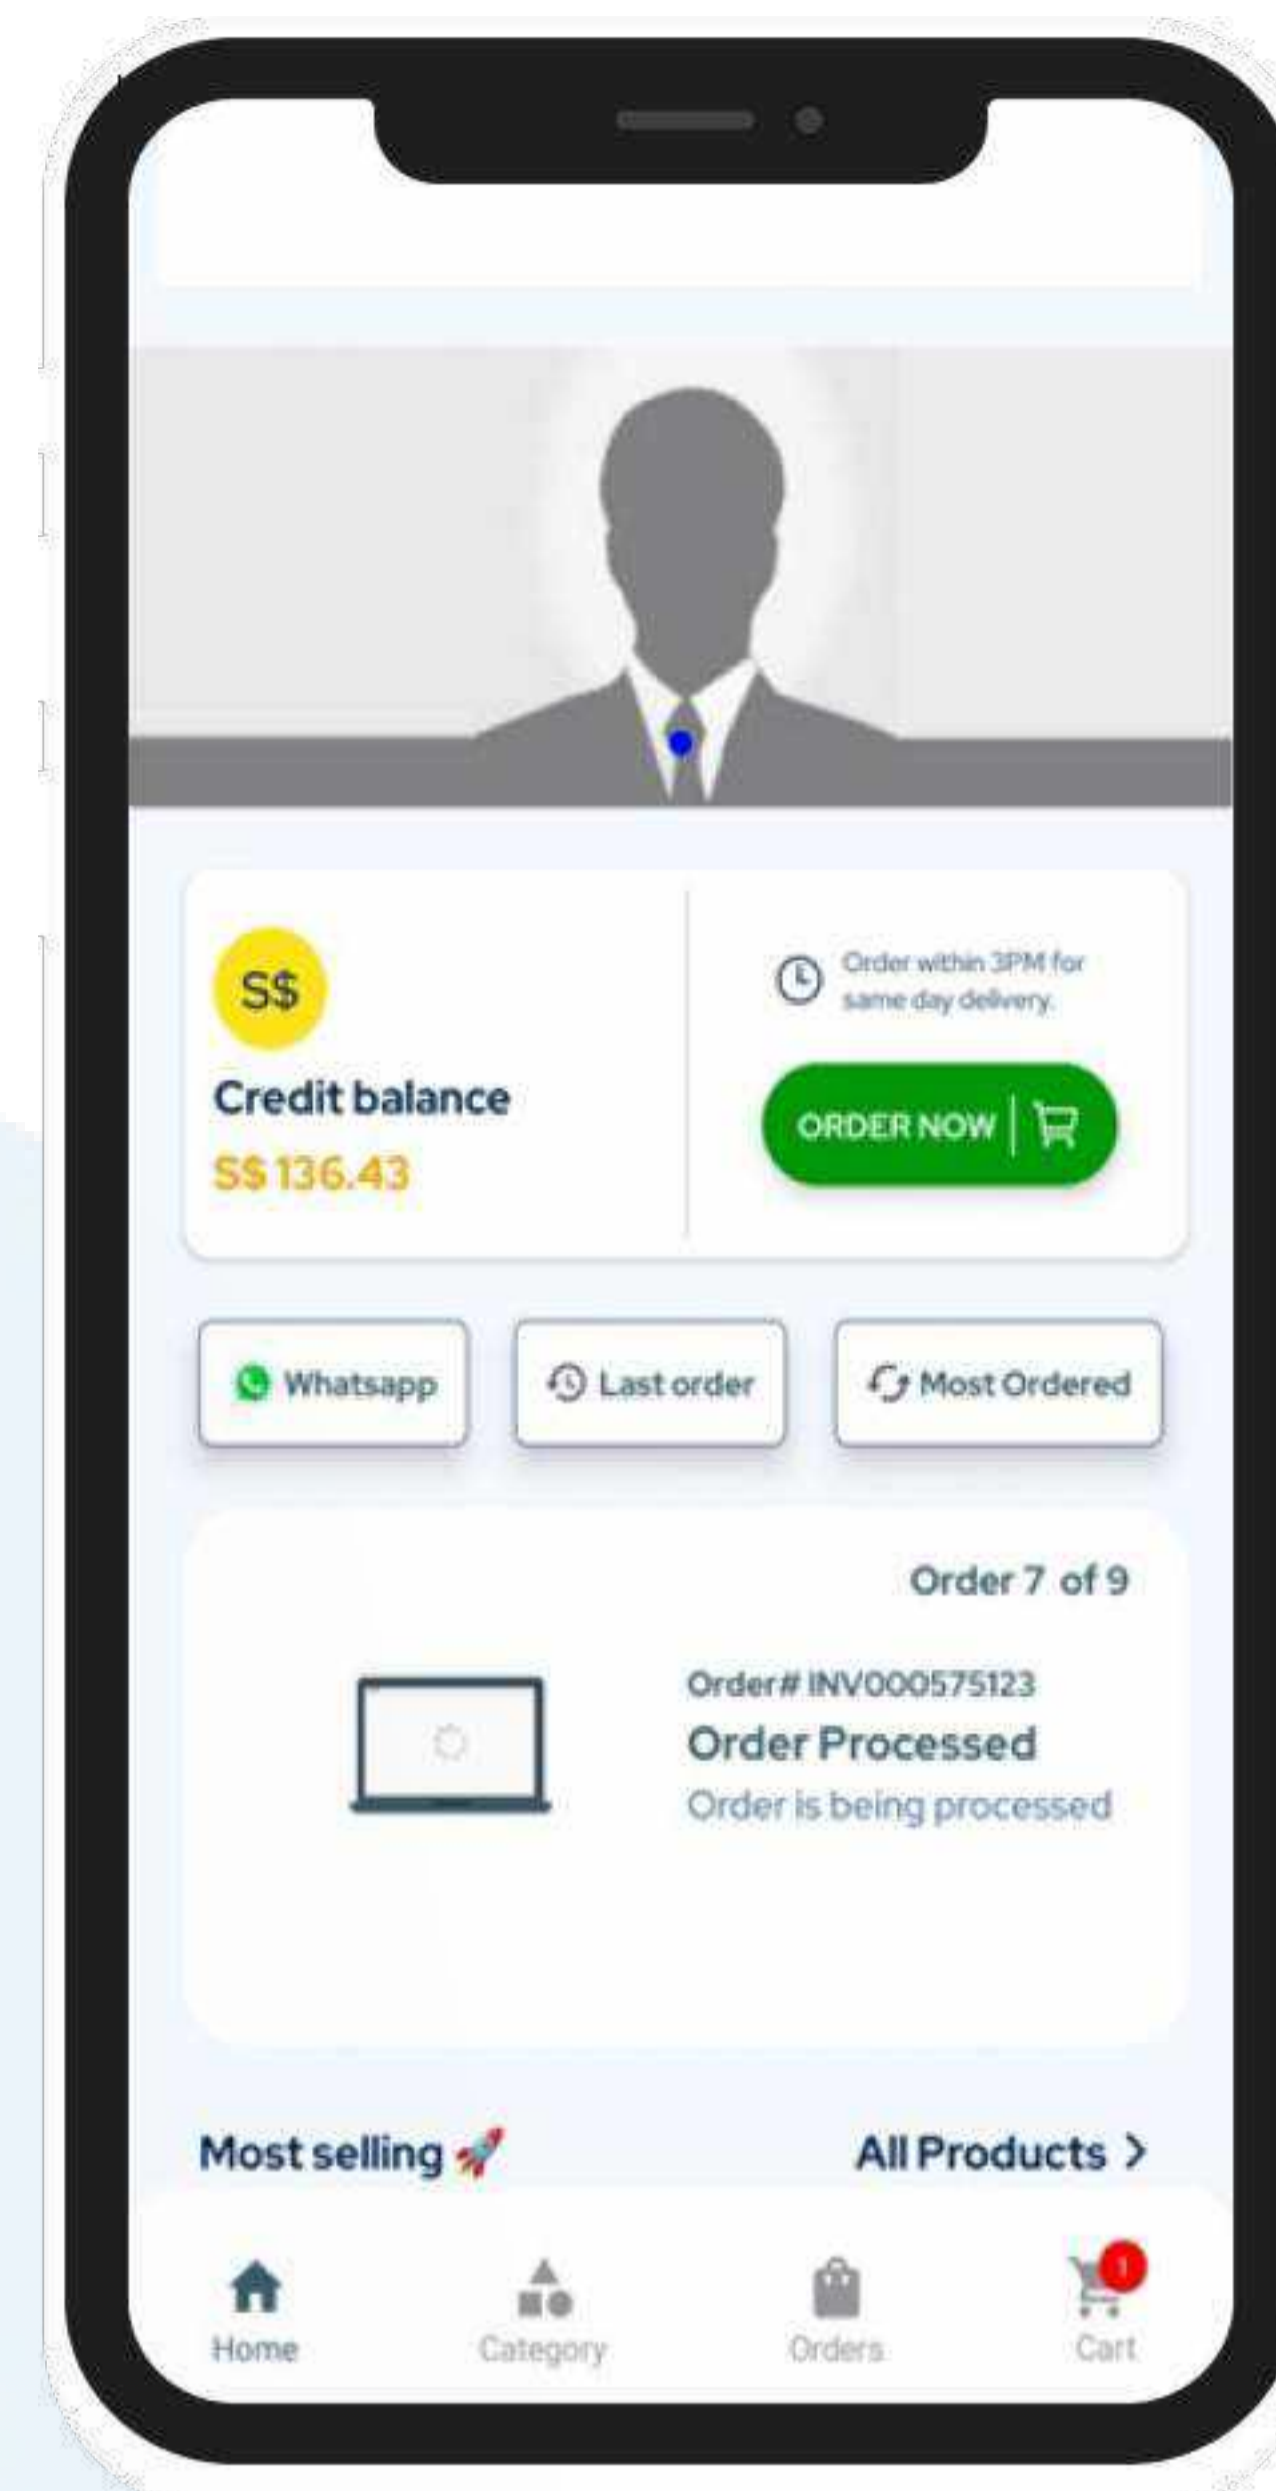

Automated Billing Clarity

Experience hassle-free credit updates alongside customer invoices, eliminating the need for separate reminders or notifications.

Enhanced Customer Experience

Enjoy a seamless, integrated system that keeps you updated and offers multiple convenient ways to manage your orders and bills.

Sales driven App

Track your Shipments

Stay updated on load locations and movement in real-time

Driver Status Alert

Receive notifications if drivers halt or take breaks, ensuring continuous monitoring and proactive management

Trip Management

Automated Delivery Management

Bid farewell to manual "assign drivers to vehicles" practices. Our Trip Management automates this process, setting it up once for seamless daily operations.

Adaptive Automation

Set up your delivery process once and let it run on autopilot. Make changes when needed without disrupting the automated flow.

Reports

Sales Reports

View all product overview of total sales and revenue

Purchase Reports

Detailed records of all purchases made, including Supplier information, purchase dates, and quantities.

GST

Summary of GST collected and paid, segregated by tax rates or categories for compliance

Expenses

Analysis of expense patterns over time, helping in budgeting and cost control measures

Profits

Instant Profit Visibility

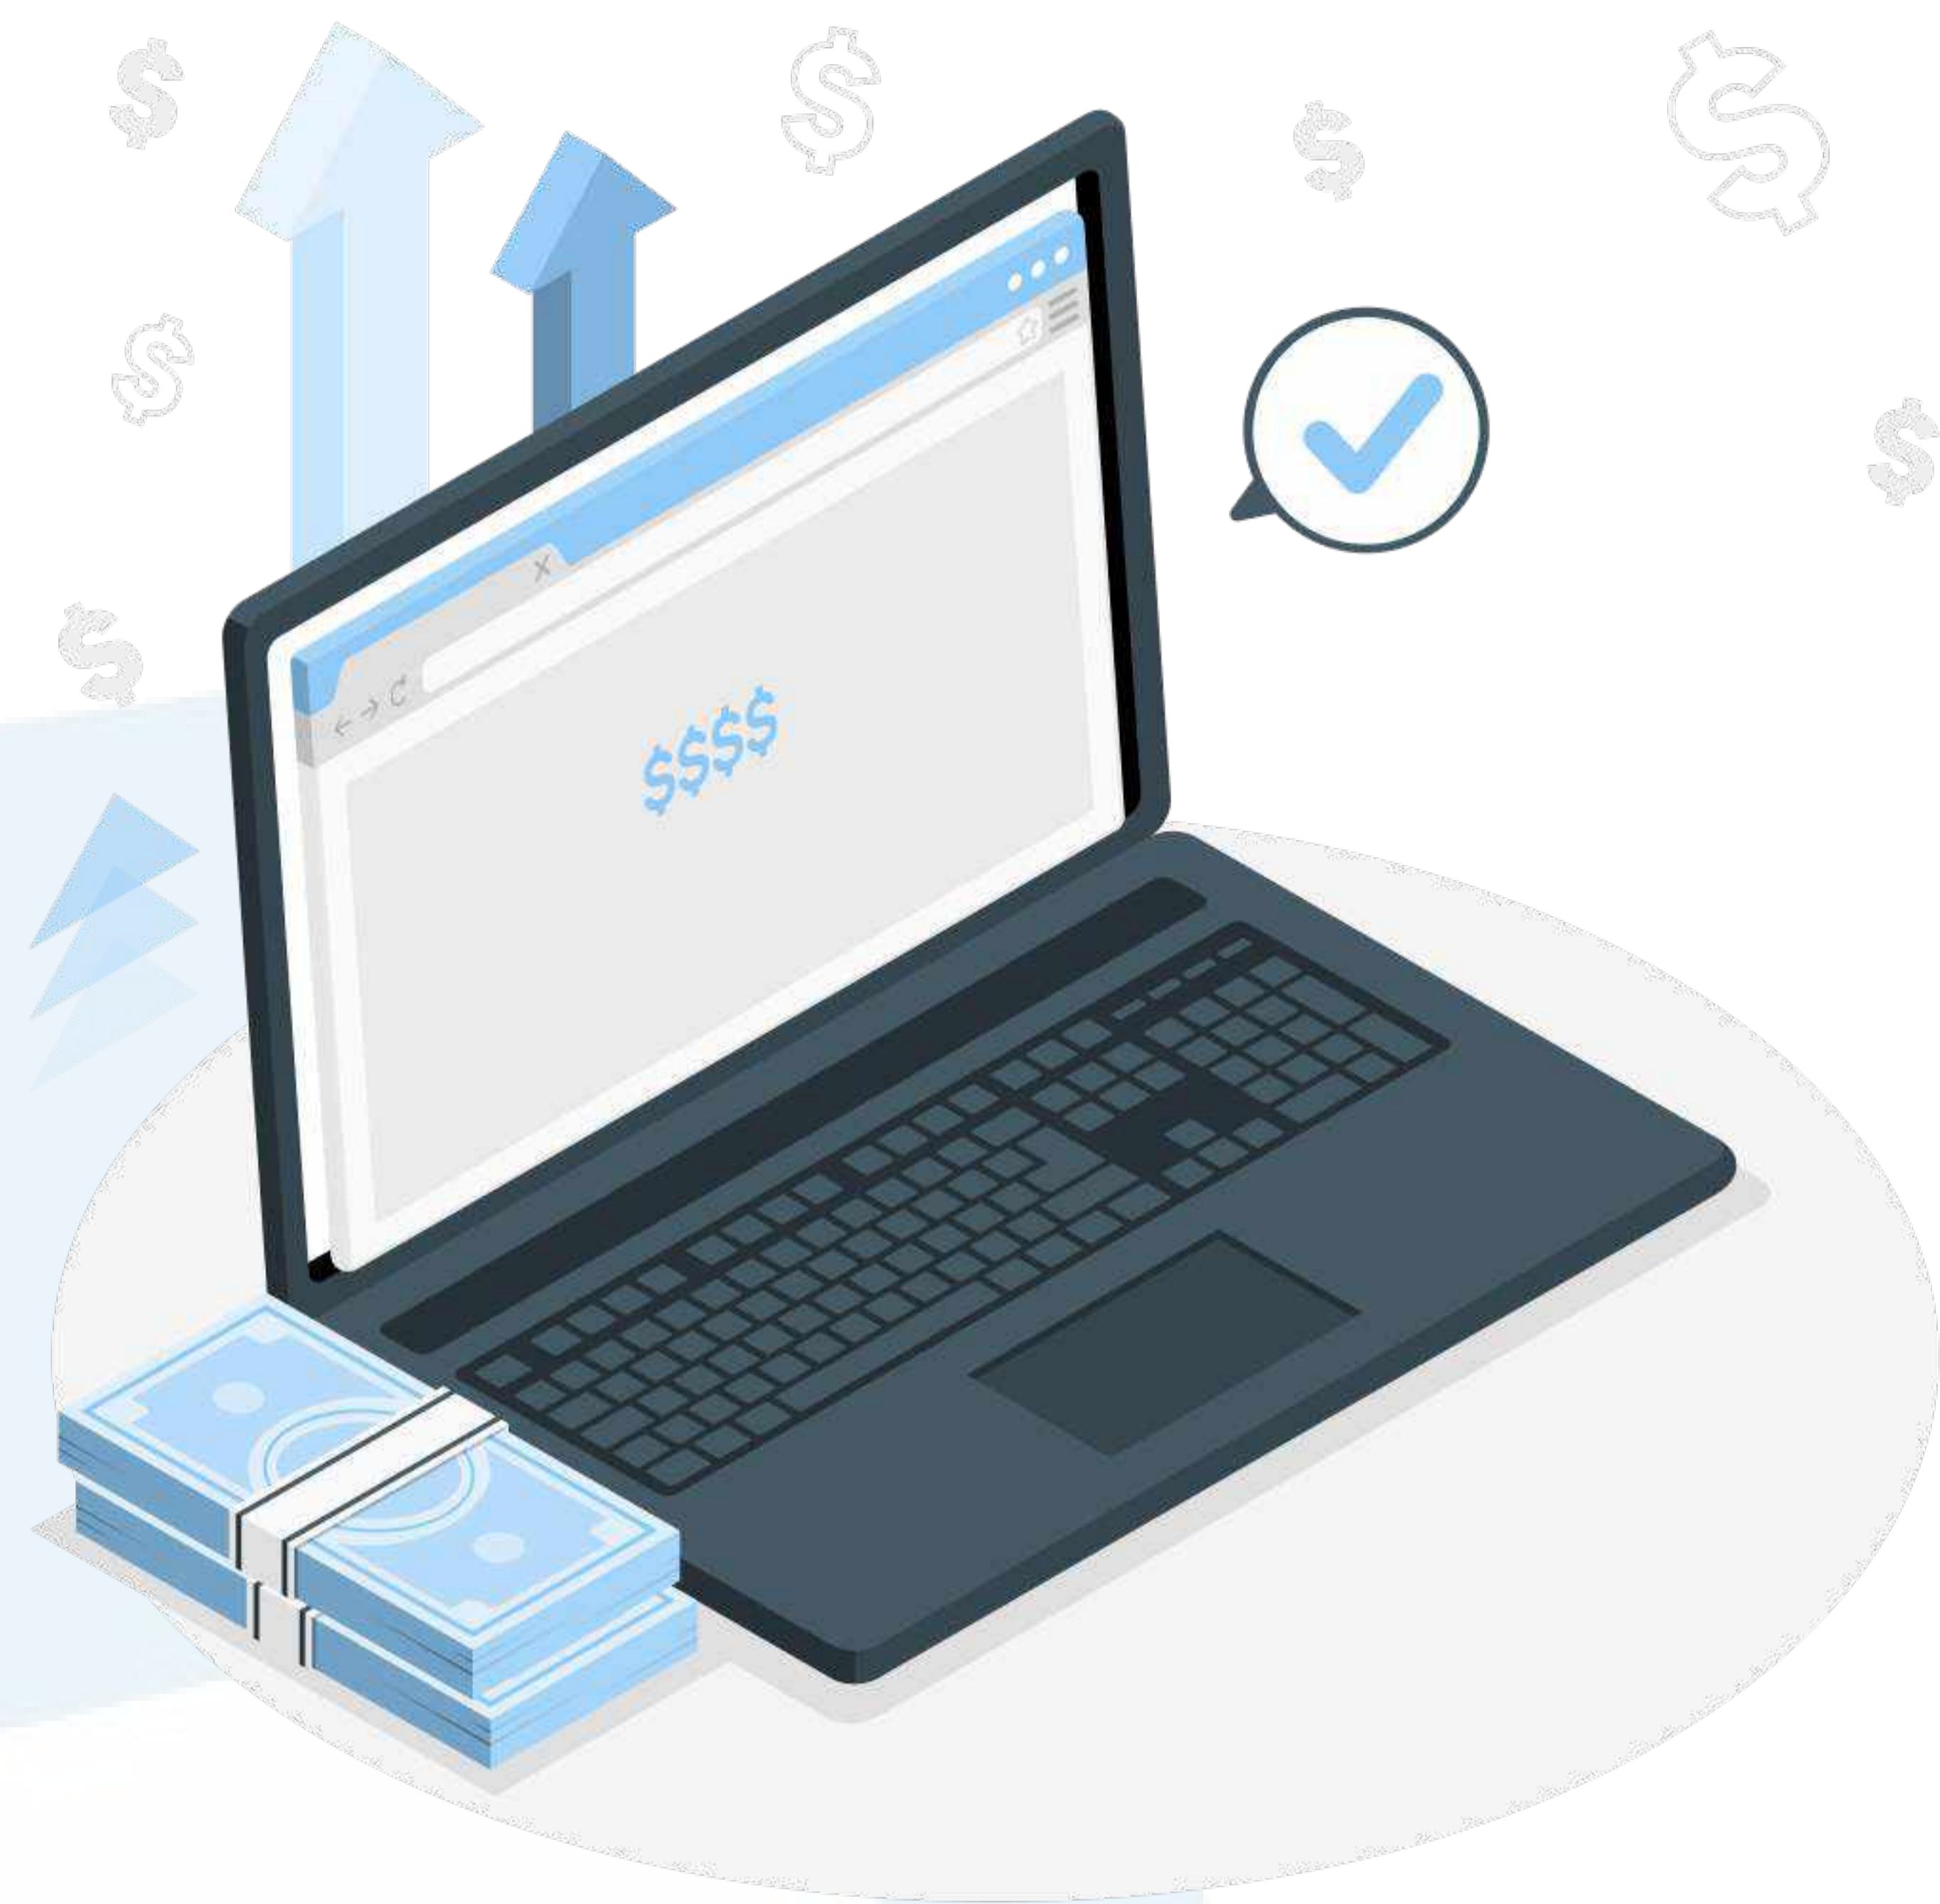

Know your profit or loss instantly at the order stage.

Avoiding Losses

By identifying losses upfront, our application shows you to avoid processing bills for unprofitable orders

Accelerated Business Growth

Profitability analysis drives business growth by identifying fast/slow-moving stock items and meeting customer needs effectively.
